Good morning to you! That is the best way to begin any new day, with the attitude that the day is going to be good. Perception is important, if you begin thinking only negative ideas, then it will be difficult to move away from those thoughts all day long. The same holds true for positive thoughts, start with those and things just seem better and brighter. Yes, I'm well aware that the weather report seems to show rain everyday this week, and I know that many are suffering from debilitating diseases. Just the same, seek the good in this new day, seek the good in each other, and call upon the Lord to deliver you from all that is less than good in your life. Over the past couple of weeks the problems that were mostly covid related have turned to different forms of cancer. This is scary for many people, and if you have been diagnosed with this then I am praying often for you. That horrible word cancer is still very frightening to the world, and I call upon you as well to pray for the disease to be eradicated. These are our friends and family members suffering, spend some time lifting them up to the Lord. Our song for this terrific Tuesday is "God of All My Days" by Casting Crowns." Have a great one
