Good morning friends! Are you already sick of these afternoons that are dark much too early? I vote yes for that question. The darkness during this time of year gets to be depressing for many people. You go to sleep and it's dark, you wake up and it's dark, and there is a large portion of your awake time that is dark as well. It could be worse, we could be living much further north and we'd experience even shorter days and much longer periods of darkness. Of course we would receive much longer times of daylight there in the summer. It is probably more than just a coincidence that we've come to equate darkness with misery and depression, while we also look to light as being healing and refreshing. Jesus Christ is the Light of the World, and if we follow Him then we will never walk in darkness. I'm for following Him because with Him comes eternal light. The darkness is what is planned for Satan and his followers. Being that I don't want to wallow in darkness for eternity, nor do I wish that for you, I would suggest that we all have faith in Jesus and follow Him to His light, the Light of Life. Our song for this Tuesday morning is a 4Him song titled "Where There Is Faith." With faith in the Lord, everything good in life is possible, follow Him
